

Curriculum vitae with track record (for researchers)

Role in the project Project manager ☐ Project participant ☐

Personal information

First name, Surname:	Marc de Kamps		
Date of birth:	31/05/1963	Sex:	M
Nationality:	Dutch		
Researcher unique identifier(s) (ORCID, ResearcherID, etc.):	ORCID: 0000-0001-7162-4425		
URL for personal website:	https://eps.leeds.ac.uk/computing/staff/390/dr-marc-de-kamps		

Education

Year	Faculty/department - University/institution - Country
1997	Ph.D. Physics – University of Amsterdam - Netherlands
1989	Master Physics – University of Amsterdam -Netherlands

Positions - current and previous

(Academic sector/research institutes/industrial sector/public sector/other)

Year	Job title – Employer - Country
2006-	Associate Professor – University of Leeds – United Kingdom
2003- 2006	Group Leader – Technical University of Munich - Germany
1997-2002	Postdoctoral Fellow – University of Leiden - Netherlands

Project management experience

(Academic sector/research institutes/industrial sector/public sector/other. Please list the most relevant.)

Year	Project owner - Project - Role - Funder
2003-2006	Chair for Robotics and Embedded Systems, TU Munich – nEUro-IT.net – EU (FET/FP5)

Supervision of students

(Total number of students)

Master's students	Ph.D. students	University/institution - Country
15	5	University of Leeds, United Kingdom
3	0	Technical University of Munich, Germany

Other relevant professional experiences

(E.g. institutional responsibilities, organisation of scientific meetings, membership in academic societies, review boards, advisory boards, committees, major research or innovation collaborations, other commissions of trust in public or private sector)

Year	Description - Role
2021-	Fellow of the Allan Turing Institute
2015-2020	PI in the Human Brain Project (EU projects: MECHAPOPOP/ HBP-SGA1/HBP-SGA2)

Track record

- 96 peer reviewed journal articles
- Selected publications:
 1. Osborne H and **de Kamps M** (2022) A numerical population density technique for N-dimensional neuron models. *Front. Neuroinform.* 16:883796. doi: 10.3389/fninf.2022.883796
 2. Broad A, Wright AI, **de Kamps M**, Treanor D (2022) Attention-guided sampling for colorectal cancer analysis with digital pathology. *Journal of Pathology Informatics.* 13
 3. York G, Osborne H, Sriya P, Astill S, **de Kamps M**, Chakrabarty S (2022) The Effect of Limb Position on a Static Knee Extension Task can be Explained with a Simple Spinal Cord Circuit Model. *Journal of Neurophysiology.* 173-187 **127.1**
 4. Osborne H, Lai YM, Lepperød ME, Sichau D, Deutz L, **de Kamps M**. (2021) MIIND : A Model-Agnostic Simulator of Neural Populations. *Frontiers in Neuroinform.* **15**
 5. **de Kamps M**; Lepperød M; Lai YM (2019) Computational geometry for modeling neural populations: From visualization to simulation. *PLoS Computational Biology*, **15** (3), e1006729.
 6. Lai YM; **de Kamps M** (2017) Population Density Equations for Stochastic Processes with Memory Kernels. *Physical Review E*, **95** (6), 062125.
 7. van de Velde F; **de Kamps M** (2006) Neural blackboard architectures of combinatorial structures in cognition. *Behavioral and Brain Sciences*, **29** (1), pp. 37-108.
 8. **de Kamps M** (2003) A simple and stable numerical solution for the population density equation. *Neural Computation*, **15** (9), pp. 2129-2146.
 9. van der Velde F; de Kamps M (2001) From knowing what to knowing where: modeling object-based attention with feedback disinhibition of activation. *J Cogn Neurosci*, **13** (4), pp. 479-491.
 10. **de Kamps M**; van de Velde F (2001) From artificial neural networks to spiking neuron populations and back again. *Neural Networks*, **14**, pp. 941-953.

Recent Plenary and keynote

Date	Title (highlight if waived registration fee and/or contribution to travel)	Location	International/na tional	Number of registrants
16/03/2017	Computational Geometry for Neural Populations	Keynote Seminar, Institut de Neurosciences des Systèmes, Marseille	International	50
03/06/2015	An Overview of Population Density Techniques	Keynote at IWINAC 2015, Elche, Spain	International	150

Invited

Date	Title (highlight if waived registration fee and/or contribution to travel)	Location	International/national	Number of registrants
07/07/2021	Developing a Reduced Bursting Neuron Model to Preserve Population-level Behaviours (delivered by PhD student Hugh Osborne, due to personal circumstances)	CNS2021, Workshop Multiscale approaches to link microscopic complexity with brain rhythms at large scales, Online	International	30
23/07/2020	Multi-dimensional population density techniques	UK Neural Computation 2020	National	Cancelled due to COVID (130 expected)
17/09/2019	MIIND Brain Circuit Insight: From brain circuit models to brain circuit insight	Satellite Seminar Bernstein Conference, Berlin	International	50
11/02/2016	Computational geometry for modelling neural population	European Institute for Theoretical Neuroscience, Workshop	International	100

- Creator of Neural Simulator MIIND: <http://miind.sf.net>
- Fellow of the Allan Turing Institute
